## 2. PRESENTER'S BACKGROUND

Bertus van Niekerk is a qualified industrial engineering with 15 years of in depth knowledge and experience in IT solution delivery, from project engagement through architecture to the management and delivery of services and products. Business domain experience includes Enterprise Asset and Supply Chain Management in Government and the Aerospace, Defense, Process Plant, Energy & Utilities, Rail & Transit and Service & Facilities industries. He was responsible for IFMS project business architecture where after he took the responsible as acting development and product manager of the IFMS release 1. The IFMS release 1 comprises of a Proof of Concept of the IFMS architecture and IFMS Asset Register bespoke development component. IFMS release 1 was successfully delivered on time and quality with commendations from SITA and the customer National Treasury. To complete the IFMS release 1 product life cycle management process the Asset Register component needed to be operationalised that includes the sell and use of product, maintenance and support and retirement of the product. This requires the informing and integration of these processes with the PSI capability. Part of the product manager responsibilities included the informing of a future PSI model and the integration of the Asset Register component as part of the PSI capability. Part of responsibilities of as business architecture and development manager included chairman of business forum and presentations part of business forum and other awareness forums that included Government organizations such as NT, SAP, DOD, DPSA as well as SITA.
