

Speaker Presentation Profile

1. PRESENTER'S INFORMATION

FULL NAME	Malose Moses Mongwe		
DESIGNATION	HoD : IFMS		
COMPANY	SITA Pty Ltd		
TEL	012 3155628	CELL	083 3767792
EMAIL	Moses.mongwe@sita.co.za		

2. PRESENTER'S BACKGROUND

Malose Moses Mongwe graduated with a B. eng (hons) degree in digital systems engineering from Sunderland University (UK) in June 1992. He complemented this with a Master of Business Leadership (MBL) degree from the University of South Africa (UNISA) in 2002.

His career spans 15 years of leadership in project & programme management, technology implementation, and corporate and business strategy in Manufacturing, IT, Banking, Telecommunications, Government, and Energy industries. Some of the most notable engineering projects he has managed and delivered include the setting up of a new manufacturing facility for concentrated powders at Unilever, the setting up and commissioning of carbon plants at Alusaf, and the setting up of a new manufacturing facility for Master Foods SA.

Some of the most notable ICT projects he has managed and delivered include the IT Strategy formulation programme for Defence Intelligence in South Africa, the development of a secure electronic communication system for The Presidency in South Africa, the development of (Customer Relationship Management) CRM solutions for Business and Corporate Banking at Standard Bank SA and the development of the call centre solution using SIEBEL, financial management solution using SAP, and Human Resource Management solution using Peoplesoft at SARS (South African Revenue Service). He was involved with business development activities for Orbicom i.e. developing new markets for electronic switching and networking technologies. He is well versed with regulatory environments of some of the African countries such as Ghana, Uganda and Nigeria and has been instrumental in ensuring compliance with regulations in these countries.

3. TITLE/TOPIC OF PRESENTATION

IFMS: From concept to realization, the journey thus far and beyond 2013

4. PRESENTATION SYNOPSIS/ABSTRACT

Brief summary of content and focus of the presentation:

The content of the presentation will include achievements to date; the roadmap to 2013; key lessons learnt; and will touch on the realization of the IFMS solution architecture, implementation options, industry participation and integration with core systems at departments

Key points for discussion include:

- IFMS Architecture realisation
- Success in proving the solution architecture
- Roadmap to 2013
- Participation by departments and industry
